

Université Saint-Joseph de Beyrouth
Career and Placement Office

Founded in 1875 by French missionaries, Saint Joseph University of Beirut (USJ) has been a strong advocate of higher education in Lebanon and in the Middle East.

USJ promotes excellence and provides high level teaching in various fields.

USJ's mission embraces dialog, freedom of speech, civic engagement, continuous education, personal integrity and leadership, all while putting forward the Jesuit values.

Presentation of CPO

The Career and Placement Office (CPO) of Saint Joseph University, carries on the mission of depicting the areas that need to be covered. Thus, to ensure better chances for USJ students to secure employment after graduation. In that perspective, the CPO assists students and young Alumni in building up their professional project.

Offering top USJ talent

True to the traditional excellence of USJ, our mission is to better prepare graduates to become outstanding employees. For this purpose, we work closely with employers to meet their hiring needs, all while recommending the best candidates USJ has to offer.

Internships

Internship programs are beneficial for employers, as the latter can evaluate up-and-coming talent and learn from students' fresh perspectives. At the same time, companies will have the opportunity to introduce their brands to students. Not to mention that employers who are offering an internship program can expedite the hiring process when needed.

Partnerships

Nowadays, companies are opting for the talent acquisition approach that mainly focuses on building relationships, anticipating future hiring requirements, and creating a sustainable talent pool of candidates. It is in that context that we created our very own partnership program with employers called FocUS-Jobs.

The Competencies and Entrepreneurship Center EC²

EC² offers training programs for entrepreneurship that boost innovation and design thinking, better preparing students to engage into the entrepreneurial journey. It also aims at developing entrepreneurial skills much valued by recruiters.

With this scenario in mind, a company may very well ask from students to develop a project that meets its requirements.

If you are interested in taking part of the coaching team, contact Mr. Edmond Chidiac on: edmond.chidiac@usj.edu.lb
